

## Overview

**Country:** Egypt

**Industry:** Entertainment

### Customer Profile

located in Egypt, is one of the most famous amusement parks in the Middle East. The Park was established in 1999 and designed by The Famous Canadian Architecture Company called Forrec. Dream Park is a member of IAAPA (International Association of Amusement Parks and Attractions). Built over 150 acres, the park consists of fantasy world of myths, legends and fairy tales for kids, fast food cafes, restaurants, souvenir shops, train, two theatres and much more.

### Business Situation

The requirement of Internet security by saying, "We faced issues related to Spam and bandwidth due to which our productivity and efficiency was affected tremendously"

**Dream Park IT Team states** "As The Internet plays a vital role for the functioning of an amusement park. we depend on Internet for providing online games to their customers, maintaining their website, general surfing and other activities. Cyberoam products had helped us immensely in solving all our problems.

## **Cyberoam UTM: A Comprehensive Internet Security Provider for Dream Park**

"We faced issues related to Spam and bandwidth due to which our productivity and efficiency was affected tremendously, Cyberoam had solved this for us"

Ahmed Samir, System Management Head, Dream Park

### Situation

The IT Department was worried about the amount of spam mails being received in the network and also noted that these mails led the employees to waste their precious time in reading and deleting the mails individually. They also increased the load on the server, creating bandwidth congestion. Hence, he wanted to control these unwanted Emails that affected their productivity. Moreover, if any of the Emails contained malware, it led to additional unnecessary hassles for all.

#### Bandwidth Deficiency

Often employees tend to use the available bandwidth for uploading, downloading, watching videos and bandwidth was adversely affected. Also, the business was hampered due to the unavailability of sufficient bandwidth.

### Solution

- The Cyberoam Solutions
- Dream Park searched the market for a solution that could meet their above challenges. During their search, they found Cyberoam to fit in their requirements and purchased Two (2) CR100iNG. They deployed them in Gateway Mode.

### Benefits

- Thanks to Cyberoam for considerably bringing down the number of Spam mails in our network.
- Bandwidth Management solution has enabled us to control the traffic and prevent blockage, resulting into stable network.
- "Cyberoam's identity-based security helps us to control all our users very easily".
